AVIATION INDUSTRY

Aviation Industry

At **LTG**, we will effectively manage the transportation and distribution of aircraft parts (AOG) and take great care in ensuring that your product, be it wings, spare parts, engines, nacelles, landing gear or any other component part, is protected across the entire supply chain – and is delivered on time, every time. From our strategically located warehouses in Rosslyn and close to OR Tambo to your final destination, you can be assured of a personalized and professional service that is tailor-made to your specific requirements.

We also offer, pre-transport storage, packing and crating services to ensure goods are ready for carriage.

Our warehouse in Rosslyn is operational 24/7, has a floor space of 6,000m² and offers clients storage space of about 9,000m². It is run on a highly efficient information technology platform integrating sophisticated warehouse management system. In addition, our facility in Pomona, Kempton Park is situated only 1,5 km from OR Tambo.

LTG's in-house logistics experts provide a comprehensive supply chain offering to assist you in making the best business decisions. In addition, we have the partnerships to negotiate the best rates and to manage import and export clearing, as well as ensure the best allocation and routing for all product handling.

*A service experience that is
both professional and personal*

Our supply chain offering

- **Order management system** – single or multiple supplier orders are entered into the system and are linked to the shipment reports. Simultaneous monitoring of orders and shipments.
- **Compliance** – export declarations, commercial invoices, certificates of origin, letter of credit processing, carnets, and free domicile shipments, as well as government legislation and international regulations, such as SADC, EU, AGOA, ISF, ASCA, CAA and AES.
- **Movement of cargo** – multimodal services for land, air and sea shipments, as well as warehousing facilities.
- **Risk management** – to mitigate financial-, cargo-, lead time- and on time delivery-, supply chain-, environmental and socio-economic risks.
- **Reverse logistics** – freight return, asset recovery, registration for re-importation (DA 65) and temporary importation for processing and repair shipments.
- **E-commerce** – electronic data interchange and communication, system integration.
- **Warehouse management systems** – warehousing, distribution, receiving, dispatch, inventory management, picking, packing, ticketing, crating, loading, and bonded and free store facilities.
